Windows 2008 Server, Windows 2003 Server, Windows 2000 Server, Windows NT Server.
Compatible with Windows 32 bit and 64 bit architectures.

AVAILABLE IN

 English  French

SOFTWARE PRESENTATION

IDEAL MIGRATION automates your Windows NT and Active Directory domain consolidation and migration.

You are able to migrate all the server objects (OU, groups, users, files, ACL, etc.) from and to any Windows NT and Active Directory server, but also too automatically change the domain client PCs without intervention.

IDEAL MIGRATION allows to migrate 32bit and 64bit architectures.

Once your migration or consolidation plan is established, **IDEAL MIGRATION** manages the transfer of required objects for the good execution of your mission.

It also presents other functions which allow you to be more selective on the objects to transfer:

- **Copy user accounts to any 32bit or 64bit systems,**
- **Moving some shared** folders from one server to another,
- **Moving file and folder securities** from one server to another,
- **Scheduling transfers** and command-line running.

BENEFITS

IDEAL MIGRATION's features and compatibility with **Active Directory**, the fact that it doesn't need a trusted relationship between your domains or that your servers are online to do a migration, **make it one of the strongest on the market.** Other strong point, the exportation and importation of objects are made with CSV files. Those files can be easily installed in a database, modified or even created by yourself.

IDEAL MIGRATION

MIGRATION AND CONSOLIDATION OF ACTIVE DIRECTORY DOMAINS

SOFTWARE FEATURES

- Full Windows NT and Active Directory Domain Migration
- Full Windows NT and Active Directory Domain Consolidation
- Windows Small Business Server (SBS) Domain Migration
- Migration can be done with or without trusted relationships
- User password migration with or without trusted relationships
- SID History Management
- Migration can be done without network link between servers
- Object migration uses CSV files for more flexibility (can be manually modified before importing)
- Automatic access permissions (ACLs) translation for files, directories and shared folders
- Client station migration to a new domain while preserving profiles (local or roaming profiles)
- Saving of migration projects
- Migration projects can be scheduled and executed from command prompt

LICENSING

Our licensing is per migrated users. Just calculate this number by verifying the number of users you need to migrate from your source domain or server (**Starts at 220 Euros**).

RECOMMENDED by Microsoft

IDEAL MIGRATION has been recommended by Microsoft for Windows NT and Active Directory migration.
