

IDEAL ALERTER 2.0

System requirements: Windows NT, Windows XP, Windows Vista, Windows 2000, Windows 2003 Server, Windows 2008 Server, Windows 7, Windows 8, Windows 2012 Server. Compatible with 32 bit and 64 bit architectures.

Available in: English  French 

Software Presentation:

IDEAL Alerter manages the monitoring of defined events and applies a set of associated actions on network servers and client workstations.

Using **IDEAL Alerter**, you can easily and remotely monitor the execution and stop of processes, monitor service status changes, monitor registry database writings, monitor event logs, monitor changes on files and directories, monitor user session events, manage disk space, detect installation or uninstalling of programs ... on all the servers and client workstations in your network...

For each event to monitor, you can define some actions to automatically execute, like running a command or script, killing a specific process, uninstalling a program, turning off a computer or locking a session, starting or stopping a service, sending an email...

➤ Monitored events:

- Process
- Service
- User session
- Software
- Disk
- Registry
- Event logs
- Point
- File / Folder
- Date

➤ Managed actions:

- Post message
- Command
- Uninstall
- Send Email
- Executable
- File / Folders
- Software update
- MSI
- Process
- Service
- Event Logs
- System

IDEAL ALERTER 2.0

- VBScript

Some examples of use:

Processes monitoring:

You want to define a blacklist of processes and automatically kill them when they are starting up ; Or you want to be alerted by an «abnormal running» of a process by monitoring its memory and CPU usage.

Registry database monitoring:

You want to be alerted when a registry key is created or when the content of a value is modified.

Event logs monitoring:

You want to be informed of «critical» system events like Audit failures in security logs.

Files and directories monitoring:

You want to be alerted when a directory of a file server exceeds a specific size.

Benefits:

IDEAL Alerter is a complete and light solution to manage alerts on Windows network. Its intuitive interface makes **IDEAL Alerter** a very easy-to-use tool.

Licensing:

Our licensing is per administrator using the product, no matter how many servers and stations you have to manage! This guarantees the best price (**Starts at 349 Euros**).
