Software Presentation:

IDEAL Secure manages the optimization of network servers and client PCs through the application of predefined actions. These settings are classified by theme: *Windows*, *Hardware*, *Network* and *Software*.

So, with **IDEAL Secure**, you can remotely optimize, secure and parameterize Windows NT, 2000, 2003, 7, XP and Vista operating systems in a few clicks and without agents.

You can easily enable or disable a set of actions on a selection of computers in a single step.

General description of the software:

- Remote application of predefined actions, without an agent
- Selection of actions depending on the operating system
- Network explorer for simplified selection of computers
- Selection of available actions by theme or keyword
- Automatic updating of actions over the Internet
- Possibility of creating your own actions
- Memorizing of favorite actions
- Checking the state of actions
- Possibility of canceling a series of actions (Rollback)
- Maintenance of all logs
- Simple, intuitive user interface

IDEAL SECURE 3.0

Benefits:

IDEAL Secure offers the possibility to modify remote registry without agent. By this way, you can easily apply new strategies on your remote servers and stations in a single step.

Licensing:

Our licensing is per administrator using the product, no matter how many servers and stations you have to manage! This guarantees the best price. (**Starts at 189 Euros**).

Certification:

IDEAL Secure has obtained the *Windows 7 Certification*. The "Compatible - Windows 7 Logo" means our products passed Microsoft's compatibility tests for 64-bit and 32-bit Windows 7. To earn the "Compatible with Windows 7" logo, software and hardware must pass Microsoft designed installation, performance, reliability, and security tests so you can be sure these products are compatible with Windows 7.
